

## Member Census RFP: Log of Respondent Questions

**1. For the enrollee records respondents will be using for this study, does AHCT know what percentage of them includes an email address? Phone number?**

Phone numbers are included in all records, email addresses included for approximately 40% of our records.

**2. Does AHCT have, or will AHCT provide to respondents, a broader timeline for this project that includes expected completion date(s)?**

We do not have a specific timeline for completion of the study. Study completion should be as quick as possible to achieve research goals, and each respondent's timeline for completion will be considered during the scoring process.

**3. Under 'methodology', AHCT references "sub-groups" of the enrollee population. Will AHCT provide their current sub-groups/categories to the respondents or will AHCT look to respondents to identify the sub-groups that should be used?**

Below are the sub-groups we use to categorize our population. Also included is a sample from an update on enrollment totals given at a recent Board of Directors meeting.

**4. Is AHCT providing a ballpark figure for the expected budget of this project?**

No, we will not provide a target budget. As noted in the RFP, vendors submitting responses should provide a detailed cost estimate based on their unique approach.

**5. Is AHCT providing its scoring criteria to respondents?**

Yes, we plan to provide the scoring criteria to all respondents by 5/9 at 5:00 PM EST. If we are unable to circulate this information by that date and time, we will inform all respondents as soon as possible.
